- Woven in recycled post-consumer polyester
- Carries the Oeko-Tex health label
- Microstructure with depth and elegant matt finish
- Elegant multicolour polyester fabric
- Unique resistance to wear
- Ideal in combination with Repetto

ELEVATION™ – UNIQUE WITH CRADLE TO CRADLE CERTIFIED™ BRONZE

Elevation is like a kaleidoscope – and the effect is intoxicating. In three interwoven colours, Elevation gives a glimpse of other worlds. To look closely at Elevation is like putting your eye to a kaleidoscope, which draws you into a magical universe with changing impressions, vibrant colours and a cascade of diagonal lines. Seen at close quarters, Elevation seems like a colourful fan, but from further away, the observer experiences more depth and calm.

100% recycled post-consumer polyester
The design is manufactured according to extremely strict environmental requirements, which is the customer's guarantee of a safe and environmentally friendly product. Elevation is woven from 100% recycled post-consumer polyester, typically originating from water bottles which have been collected and repurposed for fabric production. Elevation is Cradle to Cradle Certified™ Bronze and it also carries the Oeko-Tex health label.

Stylish, classical and innovative
The properties of Elevation are suited for upholstery and its looks will grace any interior. Elevation is the ideal covering for office furniture, screens, furniture and beds in the home. With a colour palette combining powdery nuances of black, grey, earth tones, blue and green with more vibrant colours such as red, orange, violet and yellow, Elevation covers many styles – both classical and innovative.

Elevation goes well in combination with Repetto, which is also a furnishing fabric woven from recycled post-consumer polyester. The design can also be used in excellent furnishing solutions with mesh fabrics from Gabriel.
