

Niroxx collection by Oniro

Since many years Niroxx is a very important part of our collection. An own development that we are proud of and has proven itself over years as a top product within the current project market by applicability and specifications.

A total collection of 4 different variations woven fabrics, all provided with a waterproof and anti-bacterial coating.

The Niroxx collection is permanently flame retardant, 100% waterproof, has a very high abrasion resistance and lightfastness.

Our collection has been tested by an independent institute in order to meet the highest requirements in the contract market.

We are always trying to improve our collection and because of that we now can add the "Oeko-Tex" certificate to the already impressive list of specifications.

The choice of colour and the possibility to combine these colours within the entire collection, makes Niroxx a timeless and very practical product.
